## ENGLISH TALK

Today is the time when you have to depart and go to the other side of this country to see a very beautiful scenic place. But I'll be going to a Ratnagiri to my program. I hope you are not been torture to much in your tour! After all we have 250 persons something, is too big! But somehow you all have been very considerate & co-operative that you all took all inconveniences with such pleasant faces. One has to understand that when we have love we can adjust ourselves into any circumstances & we can leave with so many people without feeling the inconveniences. But to feel, that love for another person. The love, that is without lust & greed. The love that is pure. You have to with the spirit. The comfortable spirit. Not to comfort outside.

So it is such a correlated thing, that first your spirit has to achieve a certain state and there the spirit has to reach a certain understanding of another person to the spirit. Not to the mind, not to the body, not to the circumstances, but through the spirit. When you feel the other spirit, you get the satisfaction of the spirit and not of the body. This is a very subtle point, which sometime we miss. When we start judging others we don't see the spirit. What we see? How he walk, how he talk, how he behaves, but actually that is all outside. The inner being is the spirit and if you can feel the inner being then you will be realize that inner being, if it is beautiful you enjoy it the most.

This time I must say you started on a very high note of understanding of each other and also of Indian's. The subtlety of the spiritual growth is that once start feeling integrate with the truth, with the humanity. The humanity becomes a part & parcel of your being. This is the subtle side of the truth. Then you don't think of the person as outside bad, outside good, but you thought understanding the goodness of a person through your spirit, by which you generate more goodness on that person. But supposing somebody absolutely useless & good for nothing, such a person is thrown out of organization of spiritual growth, which is a living. Like in nature, you will find whatever is not wanted is thrown. A calyx of a flower does not play any role in a making of a fruit, the calyx is thrown out. In the same way, a person who does not play any role in the collective attainment of his own, the useless things are thrown out automatically. All useful things are retain & all wasteful things are thrown.

So, one must understand that integrity to oneself is very important. There has been some reporting about people not understanding. For ex. One should not feel that you have come here for a holiday. Then you have to also understand that certain protocols in sahayajoga. For eg. husband & wife. They should understand that they have come here for their individual growth & not together. They should not oppose such a thing when it is ..... They should not try to disturb us. Is be uncivilized, to disturb others by their behavior. They have not come to spend a holiday but they have come here to achieve something individually. If that is understood then you will not ..... that you are ..... or so called comforts. Pleasures are temporary ..... into .... But the eternal life is that in which you live without doing anything & in a state of complete possessiveness, complete oneness, with complete concord in the music of God's flute. To deploying yourself of that is stupid & foolish. So, those who object also to such a glow, such an understanding are actually going against themselves.

India has very subtle vibrations. It has very subtle spiritual understanding. It's like you are entering into a deep roots of spirituality. And it is very different type of culture also you should see that. And that only can be understood if you develop your innocence. That why these peoples are so innocent. And if he heard when you tell them we will not have our food today. They think over that you are unhappy or something had got wrong. They can never understand that you are saying no to the food because you are full. That's not done anything. Is a bad manner to say that will not have the food. Can you imagine! Is a regarded very bad manner to say that will not have any food because then

people feel that we must have done something wrong that they are feeling this way. So as a simple thing I would say guideline, when you don't want have your food. It's alright, but you can come there and eat a little bit at least so that they feel you are the ..... Because they feel all the time inside themselves, Oh, God, why didn't he eat? He is without food. He is starving himself. And they feel very heart.

Is a system built in within us. So natural to us that if you are angry we don't eat our food. Or supposing we are angry in the house then we start doing some work which we are never done before like we will start washing, or doing cleaning then people know we are angry. That's the sign of anger shown. But it's natural style I think because they are very natural people. But then unnatural styles are different. Suppose somebody comes or a child comes saying, 'Mummy, I am not going to eat the food.' Then the mother will say, alright, it's good. Doesn't matter. But here the mother will ask, why? What's the matter? Why don't you eat? What is the problem? What will you have? I'll do this, I'll give you that. Supposing child comes outside ..... all kinds of A, B, C, D, E, F, G, H everything kept there. He can have what only life. No bother. He does feel happy because he has a job. But he is very unhappy inside because nobody bother about him. Then it's become a part & parcel of being personality and you don't mind. So many things people do not mind in the west and I am amazed that, How they can tolerate these things? Where people neglect you. Where people say harsh things. Where people do not even offer a cup of tea to you. But people don't mind in the west.

Another thing even if it comes to telling lies, we don't mind to tell people, that we should not heart them. Like supposing I am in the house and there are many people who come to see me know. We don't want to hurt them then there is no sin in telling them that mother is not here. You better go away. Because they won't feel hurt. But if you say She is here, but She will not see. It will hurt. So, this kind of honesty also is lacking here. That everything tells them on their faces. Whether they like it or not. It's jar a human nature. And once you start you start jarring human nature all the delicacies and all the beauties of their character disappears and they become like charcoals. They cannot feel anything. That is sensitive, that is subtle, and that is beautiful. One after .....shocks starts coming into childhood. Then they become absolutely immune. There is no sankoch, there is no formality, inner formality, not outside formality. Sankoch is not formality, but it is an inner formality, that you don't feel like same things, how can you say to him. Child comes to your house and he spilt some milk or something on your carpet. Immediately somebody will come and clean and it is a presence of the mother. This we will not do. To us carpet is not more important. The more important thing is that mother, she should not feel hurt? These things, material thing should not normally important to western people. Because they are so materially develop that they can always better replacement of their carpet. Doesn't matter. But they don't mind. Hurting another person something material prevail which is absolutely prevail us of no value. The culture of the spirit has to be developed. And the culture of the spirit lying in this country. It was once upon a time in the west also. But you have lost.

But there has so many qualities you have which Indian's have to learn. You are very intelligent. You understand Sahaja Yoga is the only way you can save the world. You have so many qualities that I cannot really in one line tell you all those things that the qualities western people have. Only things what is the inner spiritual culture which one has to learn, when you talk, when you speak, when you have the report, like in India if an elder brother told, shouted nobody feels bad at all. This is expected. They never talk to children lots. Children don't like the parents. If somebody elder, leader say something to you they don't think he is bossing. This is important. It is very individualistic culture we have in the west & that's why we have problems. While the collective culture doesn't take this there.

Now while be existing once upon a time they had balls & kings, when they had calamities they all to use join together & wok it out. But now there is, at the situation is that there is no collective culture. And today I will request you to develop that culture within yourself, collective culture. And in that collective culture we will see that we will enjoy each other's company much more than anything else on the ..... Without having any lust, greed, any impurities just you will enjoy each other's company.

That collective culture is to be imbibed and to be brought it within yourself. Nobody mind any discomfort when he didn't love. But that is . . . , while you have to have spiritually and that collective culture slowly if all the sahaja yogis of the west can imbibed I tell you can give a great leadership to the whole world. Because that's the only thing lacking in the west. That's the only thing they have to achieve is a collective culture. Complete love & understand, complete integration, possessiveness.

This time group has been very, very nice. I was so surprised that 50% have new people but so good. The quality of good people is so very good. They are not mediocre and I could feel a oneness which they are moving. So now we are within forward another very important occasion. And in that we have to see that they have 51 marriages will have to perform. So everybody should learn to enjoy those 51 marriages. May be, there have may be some problems, something, may not be that efficient, of course. . . . . always work out very well, maybe, but try to enjoy every bit of it. Open you heart. Try to enjoy every bit of it the collective marriages of 51 peoples. And individually you will find all of them having a very beautiful expression and very beautiful aspiration & the whole thing will be very beautiful, if you have that collective understanding in yourself. Otherwise, I didn't get this, I didn't get that, last time the marriages were very beautiful. I mean say the jungle I have. . . , along the seashore behind the huge marriages. Try to enjoy each & try to make it a success. And after marriages also we must remember that if he cannot make two persons live together happily, how are we going to make the whole world live together? So both perfected, the situation has the wife & the husband two different personality of different temperament have to live together to show to the world that is two persons cannot live how can the whole world live? And these two persons make symbolic expressions of that unity about which I say.

You being all realized soul. You should bring have a very nice time after your marriage. But too much of everything is bad. Must keep a control. Should not go too much. . . . Must keep a kind of control. And if you keep a kind of control then you will enjoy the marriage in his fullness. So we are looking forward to that great occasion of 51 marriages. I hope it going to 51, that's how we have 49 people. I must say that Warren has then a good job out of this. Actually he wants to buy me a present for the wedding; I think he should have it, instead of me. He has really done wonderful thing and I shoot of like a stars from here to there and I find out person one from Asia, another from Timbuktu and he just accept it and it works out. It works out.

So, I hope we will try to co-operate, made co-operate with the spirit. Co-operate with this great moment of the whole world. In this to know your responsibility that this marriage you are doing for sahaja yoga. For the emancipation of the whole humanity & that's how if you understand your responsibility you will understand that marriage is not for yourself, for your own comforts or anything. It is further comfort for the whole world.

May God Bless You!
